May 30, 2024

The Idaho Division of Occupational and Professional Licenses (DOPL) has decided to implement a phased approach to transitioning Boards to the new Licensing system. The Boards and Programs listed below **will not** be transitioning to the new licensing system in July. Instead, they will transition on November 4, 2024, to align with the slowdown in building and recreational activities during the winter months:

Building Code
Damage Prevention
Electrical
Elevator Program
Factory Built Structures
HVAC
Industrial Safety
Logging Safety
Plumbing
Public Works Contractors
Outfitters and Guides

In order to ensure a smooth process for our customers during their busiest building and outdoor recreational seasons, DOPL has made this decision to minimize any potential disruptions for permitting, licensure, or inspections. Trade Permits will continue to be purchased in the existing system through October 31, 2024.

DOPL will provide you with additional information in the early fall as the second stage of the new licensing system implementation approaches.

You can find additional information regarding the new system at:

Sincerely,

Russell S. Barron
Administrator
