Out of State Telecommuting Update

Montana - Due to the employment laws in Montana being in direct contradiction with Idaho employment law, we will not be approving telework agreements for that state.

Oregon - We are finalizing a review of Oregon after new Oregon legislation has been approved for additional leave. We will be limiting out of state work in Oregon to those who are required to work in the state and to very difficult to fill positions (such as Psychiatrists etc.). We will provide more details soon.

California - Teleworking in California will not be allowed.
