

2019 IGC-EC INTERIM MEMBER BIOGRAPHY:

BETTY CONCES (Kootenai County)

I have worked in parcel mapping for the greater part of my working career, starting in 1979 with the US Forest Service, then to Lincoln County, Montana, a few surveyors' offices and finally landing in Kootenai County, Idaho. During my career at Kootenai County I have been fortunate to work with supervisors and mentors who have helped me along the way to expand my expertise by leading projects from conception to implementation. I have been given opportunities to work with many people across the state in various capacities and look forward to working with many of the same people again.

My education comes from some college, I started out wanting to be a graphic artist, then on to on-the-job training primarily with a mix of continuing education and workshops. I received my GIS Certificate from the University of Idaho in 2004 and have been involved with the Northern Rockies Chapter of URISA in various functions since 2000 and I have also helped with many Intermountain GIS conferences.

As of January 2019 I am a Land Records Manager and now enjoy learning a new level of duties and opportunities that come with this position.

I hope to serve the IGC-EC in a capacity that is helpful and supportive to the members it serves.
