Authoritative Source(s) Description: (Include name of organization, contact information, and legal authority description)

Idaho Code §§ 67 2402(1) and 67 4222(a)

The Idaho Park and Recreation Board directed the Idaho Department of Parks and Recreation to develop an online trails mapping application that let citizens know where they can use their vehicles, animals, and hike on trails through the State of Idaho.

Trusted Source Description (Include name of organization & contact information)

The Authoritative Source is publishing the data, hence is the Trusted Source.

Please attach copies of the agreements between Authoritative Source(s) and Trusted Source.

Minimum Scale of Dataset: 1:24000

Please describe the proposed maintenance schedule for the dataset:

The dataset is continually updated on at least weekly basis. Annually, the Idaho Dept. of Parks and Recreation contacts land management agencies to get the most current data (Forest Service, BLM, State Park, Idaho Fish and Game, Idaho Department of Lands)

If this dataset is not a statewide coverage, please describe the methodology for developing or incorporating other data to make a statewide coverage.

The Idaho Trails dataset covers the entire State of Idaho. The IDPR gathers as much information as we can to post the information to the Idaho Trails Application.

Other information for the IGC-EC to consider:

The Idaho Trails Application is the most popular source of trails information in Idaho. In 2017, the web map was visited 93,878 times. This was at a time when the web application did not have a google search capability until November 2017.

For desktop users, the Idaho Trails information is contained in a Map Package located on ArcGIS online. The map package can be accessed at:

<https://idaho.maps.arcgis.com/home/item.html?id=27b6c7f418ff4881abb9854d3fb9412d>

For people wanting to add the service to a map with ArcGIS Online, the map service is located at:

https://gis2.idaho.gov/arcgis/rest/services/DPR/Idaho_Trails_Map/MapServer

I developed a web application that serves as be base app. The base app is located at

<https://trails.idaho.gov/>

The Idaho Trails Web Application is also the most viewed web app on the State of Idaho Featured Content on ArcGIS Online. The information is also shown in ESRI's Living Atlas.
