Welcome to GDG

System Status:
All contracted NAIP 2020 Compressed County Mosaics (CCM) are completed and posted to the Geospatial Data Gateway direct download site, https://nrcs.app.box.com/v/naip. The following states were completed: California, Indiana, Kentucky, Michigan, Missouri, Mississippi, North Carolina, North Dakota, Nebraska, New Mexico, Oregon, South Dakota, Texas, Wisconsin and West Virginia. In addition, partial coverage of new CCMs were completed for Montana and Washington state. All states have natural color and color infrared CCMs with Seamline (Index) Shapefiles available.

As of December 31, 2019 the Raster Soil Survey datasets are only available through the Direct Download option on the home page and are no longer available through the Gateway ordering process.

The Geospatial Data Gateway (GDG) provides access to a map library of over 100 high resolution vector and raster layers in the Geospatial Data Warehouse. It is the One Stop Source for environmental and natural resources data, at any time, from anywhere, to anyone. It allows you to choose your area of interest, browse and select data, customize the format, then review and download.

This service is made available through a close partnership between the three Service Center Agencies (SCA); Natural Resources Conservation Service (NRCS), Farm Service Agency (FSA) and Rural Development (RD).

I Want To

- Direct NAIP Download
- Direct Data Download
- Order by County/Counties
- Order by State
- Order by Place
- Order by entering Latitude/Longitude Bounding Rectangle
- Order by Interactive Map using custom Area Of Interest

Direct Data / NAIP Download
The most frequently downloaded datasets are available for direct download without placing an order. Locate the .zip file then download.
For layers organized by state, locate the .zip file with a named with a state postal code. NAIP is further identified by county FIPS.
Elevation data is organized by 1 degree blocks. Locate the .zip file named by latitude and longitude or quadrangle.
Watershed Boundary Dataset covers the entire US.
